Genus/Species	Common Name	Tree Descriptions	Mature Height (m)	Mature Width (m)	Flower Season	WA/ Native/ Exotic	Flowers	Leaves
<i>Banksia menziesii</i>	Firewood Banksia	Banksia menziesii is a decorative tree with thick, woolly branches and serrated, dark green leaves. Produces a profusion of acorn-shaped red flowers during autumn and winter. Ideal as a feature tree, in parks or a specimen tree. The flowers are bird attracting. Thrives in any well drained soil in full sun or part shade position, tolerating extended dry periods and frost, when established. Prune after flowering to promote new growth.	7	3	Spr	WA Native		
<i>Corymbia ficifolia</i>	Red Flowering Gum	Native to Western Australia, Corymbia ficifolia is one of Australia's most popular cultivated species. It is relatively fast growing with rough bark that does not shed often. Flowers are borne in clusters and range in colour from red to orange.	8	5	Spr/Sum	WA Native		
<i>Eucalyptus caesia</i>	Silver Princess	Eucalyptus caesia 'Silver Princess', is a delightful small tree for any garden or landscape. The branches, leaves and flower buds and fruit are silvery-white giving it the name Silver Princess. The bark of Silver Princess changes colour throughout the seasons with branches that can weep to the ground. The foliage is silvery blue with large red/pink or sometimes white flowers followed by large silver gum nuts, which are a food source to native birds. Silver Princess is waterwise and is widely grown as an ornamental tree, however has become quite rare in the wild. Silver Princess can be pruned to maintain shape or cut right back to the ground to produce a multi-stem mallee type look.	6-8	5	Aut/Win	WA Native		
<i>Eucalyptus forrestiana</i>	Fuchsia Gum	Native to Western Australia, Eucalyptus forrestiana is a small tree with an open canopy. It displays smooth grey trunk and dark green foliage. It produces unique gumnut flowers with a striking red nut and yellow petals which appear in Summer	5	4	Sum/Aut	WA Native		
<i>Eucalyptus utilis</i>	Coastal Mort	Native to Western Australia, Eucalyptus utilis has a dense, round canopy with large branches. The bark is rough and grey while the flowers, which bloom in spring and summer, are white and delicate in nature.	6-8	6-8	Spr/Sum	WA Native		

<i>Eucalyptus Torwood</i>		Eucalyptus torwood is a naturally formed hybrid cross between Euc. torquata and Euc. woodwardii. This small evergreen, native tree has blue-green foliage. During the summer, but not limited to, it will produce clusters of large showy flowers that range from yellow through to shades of orange and scarlet. Torwood will attract nectar feeding birds and insects to the garden and also makes an attractive shade tree. Drought and frost tolerant, making it incredibly low maintenance and easy to look after. Plant in a full sun position in well-draining soil.	5-8	6-8	Spr/Sum	WA Native		
<i>Jacaranda mimosifolia</i>	Jacaranda	Exotic to Australia, Jacaranda mimosifolia is a fast-growing, deciduous tree. It has large, fern-like leaves which are bright green in colour and produces masses of lilac, tubular flowers in Spring and Summer.	14	10	Spr	Exotic		
<i>Macadamia integrifolia x M.tetraphylla 'Beaumont'</i>	Macadamia tree	A native tree wide with glossy leaves that fade from maroon to deep green. In spring it produces fragrant, pendulous, flowers that slowly form in the macadamia nuts. The harvest period is all the way from March to July and you know the nuts are ready when they fall to the ground. The Beaumont variety is a fast, prolific fruiter that is easy to shell, making it perfect for the home garden.	6-8	6	Win/Spr	Aus Native		
<i>Melaleuca leucadendra</i>	Weeping Paperbark	Evergreen tree with papery thick and pale spongy bark. Dull green and pendulous leaves. White to creamy spikes of flowers. Ideal for moist areas. Has a soft weeping habit and has bird attracting flowers. Tolerates moist conditions.	10	5	Aut	Aus Native		
<i>Pipturus argenteus</i>	Native Mulberry	Fast-growing species that may be cultivated as a shrub or small tree. The fruits of the Native Mulberry are small and white, almost translucent in appearance. Like strawberries, they bear their seeds on the outside. They are soft and juicy, with a sweet and delicate flavour, though like conventional mulberries, can vary in taste and texture	3-8	3-5	Sum/Aut/Win	Aus Native
