Authority for participation in the School Recycling Education Program

Principle name:	
Signature:	
Date:	

Participation terms and conditions

As part of the School Recycling Education Program, the participating school will agree to the following:

1. The City of Bayswater will provide up to six recycling and six FOGO bins*, free of charge, to the high school. The free service is provided to promote the correct methodology of waste disposal and recycling, and divert waste from landfill where possible.
2. The school agrees to continue to participate in waste and environmental education programs provided or organised by the City of Bayswater. This may be up to once per year.
3. The school agrees to participate in waste audits and site visits, to be undertaken by the City of Bayswater or an authorised party, to assist in gathering data about usage of the bins provided free of charge. This may be to gain further understanding about future education requirements, or used to provide advice to the school about possibilities of reducing waste charges through the proper use of the bins.
4. The school understands that the bins provided free of charge by the City of Bayswater are intended to divert food waste from landfill, and educate staff and students about using the three-bin FOGO system. The bins provided free of charge are not intended for use by gardeners / groundskeepers, and should not be used as additional capacity for green waste.
5. The City of Bayswater can remove bins at any point (with notice given) if changes are made to the Common Use Agreement (CUA) for waste. Bins can be provided free of charge as an exemption to the CUA as they are used as an education tool for students. Direction from the

Department of Education and Department of Treasury and Finance will stipulate future actions taken.

6. The school understands that it is the responsibility of the school to arrange for the relevant bins to be presented to the verge for collection on the normal collection day for the area. The normal collection day can be found by visiting bayswater.wa.gov.au/bins.

* This is intended as a guide, and the number of bins can be negotiated with the City prior to the start of the program and can be re-evaluated after three (3) months of having the bins onsite. Please contact the City's Waste Education Officer at 9272 0964 or fogo@bayswater.wa.gov.au.

General waste bins can be considered as part of this program, and will be provided subject to the bin location and opportunity for usage by students. A site visit can confirm viability of this.

Examples of Education Available:

- Tour of Red Hill Waste Management Facility (Red Hill) – FOGO and Landfill
- Tour of Cleanaway Materials Recovery Facility (South Guildford) – Recycling
- Cleanaway Incursion – Recycling and waste sorting
- Enviro House Incursion – FOGO, recycling and waste reduction

(OFFICE USE ONLY)
