

Additional Information

I'm Jovana Nikolic, an optical assistant, a teaching student at ECU, and a member of WA Socialists. I'm running for the West Ward in Bayswater.

Every day, I speak to people whose lives have been turned upside down by the cost of living and housing crises. Families are being forced to choose between food, rent, and healthcare - basic needs that should never be up for compromise.

I will fight for public spending that improves the lives of working-class people, by increasing the affordable and public housing stock in Bayswater, by improving community services, including those for children, youth and elderly residents.

I am committed to fight for a council that takes a stand on the big issues as well. This means taking a stand for Palestine - divesting from those companies complicit in the genocide and pressuring our politicians to sanction Israel.

As a member of WA Socialists, I want to fight for Bayswater to be a place where the needs of people are put before profit.
