

Let's go FOGO!

It's time to start placing your food scraps and other FOGO-friendly items into your lime green-lidded bin, along with your organic garden waste. Your lime green-lidded bin is now your FOGO bin. This bin will be collected weekly on your usual bin day.

FOGO will reduce our household waste going to landfill, and your FOGO bin contents will be turned into compost. This is game-changing for the environment, and we all get to do our part.

Kitchen caddy tips

- Collect your food scraps in the caddy and then place them (including the liner) into your FOGO bin.
- Only use the compostable liners provided by the City. Please do not use any other plastic bags.
- You can also line your caddy with newspaper, or nothing at all.
- Biodegradable or degradable bags must not be used for the FOGO bin. Use only certified compostable bags.

We're here to help!
