

NOISE MANAGEMENT PLAN

Baysie Waves Fest 2018

1. Preliminary

The City of Bayswater is combining the Bayswater Waves Family Fun Day and Baysie Youth Festival combining at the Bayswater Waves Facility on Sunday 18 February 2018, from 10am -6pm.

In accordance with *Regulation 7* within the *Environmental Protection (Noise) Regulations 1997* (the Regulations); for the event to proceed the City will be required to implement a noise management plan as per the below.

This will be a similar format to the event structure at the same venue in January 2017.

2. Event Details

| Work Hours: | 10am -6pm |
| Start Date: | Sunday 18 February 2018 |
| Finish Date: | Sunday 18 February 2018 |
| Sound Sources | <ul style="list-style-type: none"> • 10.00am-3.00pm - DJ • 3.30pm - 4.15pm - Solo acoustic performer • 4.30pm-5.15pm - 5 piece band |

3. Activities and Control Measures

Control Measures

- There will be a maximum capability of permitted noise levels of 80dB(A) (decibels, A weighted) at this distance.
- All local residents within a 500 metres radius of Bayswater Waves will be provided contact details of City staff on site at the event and City of Bayswater Security.
- Speakers will be faced away from residential areas (where possible), the closest residential dwelling is approximately 46.4m away from the venue across a main road (15,000 cars).
- City staff managing the event will monitor the noise levels at the mixing desk at regular intervals throughout the day, including if a complaint is made.

4. Predicted Noise Emissions and Monitoring

Noise emission levels based on the mixing desk is operating at 80dB(A) measured at 15 metres from the stage, the predicted noise level for a resident at 66.7dB(A) would be above the maximum permitted noise level of 65dB(A) however with an influencing factor of the major road (15,000 cars), Broun Avenue, and Bayswater Waves being a commercial facility, will affect the influencing factor.

Monitoring will be conducted at the mixing desk 15 metres from the stage that the level must not exceed 80dB(A) to ensure the emitted noise level is within the guidelines at residential properties.

5. Notification and Complaints

All residents within 500 metres of the event will be notified using the following City of Bayswater notification. The affected residents will be contacted via letter which will be distributed one week prior from the event.

Dear Resident

CITY OF BAYSWATER - BAYSIE WAVES FEST

I write to advise that the City of Bayswater is conducting the Bayswater Waves Fest 2018 event at Corner Broun Avenue and Priestley Street, Embleton, on **Sunday 18 February 2018, 10am - 6pm.**

In order to minimise noise and disturbance, these activities are strictly controlled under a Noise Management Plan approved by the City of Bayswater.

Should you require further information or have any comments during the event hours please contact one of the contacts below:

1. John Smith, Community Development Officer on 0439 249 644; or
2. City of Bayswater Security Services on 1300 360 333.

A City of Bayswater point of contact is provided to handle enquiries and complaints and take remedial action in the first instance. All comments will be recorded and referred to the City of Bayswater's Environmental Health Section along with any actions taken in response to any complaints. The Event Coordinator will also ensure that any actions taken to address a noise complaint are communicated to all crew members.

Should you wish to discuss this letter prior to the event please contact Community Development Officer, John Smith, on 9272 0622.

Kind regards

KAREN QUIGLEY
MANAGER COMMUNITY DEVELOPMENT
