

Residential parking permit application

Residential parking permits

The intent of the parking permits is to enable parking of additional vehicles outside a residence where insufficient off street parking exists and it is reasonable for additional parking to be provided, at the discretion of the City. The permits are only valid for the street in which the resident resides and do not negate the requirement to comply with all other laws. The permits do not entitle the holder to a specific parking position, the availability of a parking space cannot be guaranteed and permits are specifically for use in time restricted parking locations. Permits are not for use by a business or commercial enterprise.
