Email address:

About the tree(s)

Property address or Name:

Description of location within property:

Please select one: Single Tree Group of trees

If 'group', how many trees are in the group?

Botanical name (if known):

Height (approximate):

DBH (Diameter at breast height):

Width of canopy:

Age classification:

QTRA or TRAQ risk assessment:

Observations of the tree(s) health and condition:

Please select at least one criterion from at least two categories (1 to 5)

Category 1 – Growth/Size Significance

A tree(s) that is outstanding for its height or trunk circumference - 500mm diameter at breast height and/or over 7m high.

Category 2 – Outstanding Visual/Aesthetic Significance

A tree(s) that occurs in a prominent location or context;

A tree(s) that contributes significantly to the landscape in which it grows in comparison to other trees grown within a 100m radius - including streetscapes, parks, gardens or natural landscapes.

A tree(s) that exhibits an unusual growth form or physical feature; and/or

A tree(s) that is of a significant age - 100 years or older.

Category 3 – Botanic/Scientific Significance

A tree(s) that is of an important genetic value that could provide important and valuable propagating stock. This could include specimens that are particularly resistant to disease or climatic extremes or have a particular growth form; and/or

A tree(s) that is of an important genetic value that could provide important and valuable propagating stock. This could include specimens that are particularly resistant to disease or climatic extremes or have a particular growth form; and/or

A tree(s) that demonstrates a likelihood for producing information that will help the wider understanding of natural or cultural history by virtue of its use as a research site, teaching site, type locality or benchmark site.

Category 4 – Significant Ecological Value

A priority, rare, threatened or locally uncommon species or ecological community;

An indigenous/endemic remnant tree(s) that predates the urban development in its immediate proximity;

A tree(s) that makes a significant contribution to the integrity of an ecological community, including its role as a seed source or specialised habitat;

A remnant endemic specimen(s) now reduced in range or abundance, which indicates the former extent of the species, particularly range limits; 5. A tree(s) that is part of a significant habitat element for rare, threatened, priority or locally uncommon or common native species; and/or

A tree(s) proximity to recognised ecological linkages or biodiversity corridors.

Category 5 – Historical, Commemorative, Cultural or Social Significance

A tree(s) that is associated with public significance or important historical event for the City; and/or

A tree(s) that is highly valued by the community or cultural groups for reasons of strong religious, spiritual, cultural or other social associations, including trees associated with Aboriginal heritage and culture.
