

# Greenwaste (Green Top)

Did you know that the City of Bayswater recycles the contents of your greenwaste bin into soil improver for lawns and gardens? That is why it is important to place **ONLY** greenwaste into your **limegreen**-top bin.

The greenwaste from your **limegreen**-top bin is taken to Red Hill Waste Management Facility where it is shredded into smaller pieces and composted. A product called soil improver is produced; this is used when establishing new turf and for improving soils in gardens.
